

一键安装 redmine3.2.0，安装过程一路 NEXT 即可。安装敏捷插件时会遇到相关问题。现所安装插件经验分享下。

第一：下载 redmine_agile-1_4_0-light 敏捷插件文件，解压后放到

C:\BitNami\redmine-3.2.0-1\apps\redmine\htdocs\plugins 目录下

第二：执行：C:\BitNami\redmine-3.2.0-1\apps\redmine\htdocs\plugins>bundle install 命令。

第三：执行：

```
C:\BitNami\redmine-3.2.0-1\apps\redmine\htdocs\plugins>rakeredmine:plugins:migrate
RAILS_ENV=production 命令。
```

执行后报出红色部分的错误提示

```
C:\BitNami\redmine-3.2.0-1\apps\redmine\htdocs\plugins>rake redmine:plugins:migrate
RAILS_ENV=production
```

```
(in C:/BitNami/redmine-3.2.0-1/apps/redmine/htdocs)
```

```
rake aborted!      p
```

```
You have already activated rake 10.1.0, but your Gemfile requires rake 10.4.2. P  gem install
-v=10.4.2 rake
```

repending `bundle exec` to your command may solve this.

```
C:/BitNami/redmine-3.2.0-1/apps/redmine/htdocs/config/boot.rb:6:in `<top (required)>'
```

```
C:/BitNami/redmine-3.2.0-1/apps/redmine/htdocs/config/application.rb:1:in `<top
(required)>'
```

```
C:/BitNami/redmine-3.2.0-1/apps/redmine/htdocs/Rakefile:5:in `<top (required)>'
```

(See full trace by running task with --trace)

解决方法如下：依次执行下面命令进行解决

```
C:\BitNami\redmine-3.2.0-1>gem sources --remove https://rubygems.org/
```

```
C:\BitNami\redmine-3.2.0-1>gem sources
```

```
--addhttps://rubygems-china.oss-cn-hangzhou.aliyuncs.com/
```

```
C:\BitNami\redmine-3.2.0-1>gem install rake -v '10.4.2'
```

```
C:\BitNami\redmine-3.2.0-1>gem install rake -v '10.4.2'
Fetching: rake-10.4.2.gem (100%)
rake's executable "rake" conflicts with C:/BitNami/redmine-3.2.0-1/ruby/bin/rake

Overwrite the executable? [yN]  gem install rake -v '10.4.2' y
rake's executable "rake" conflicts with C:/BitNami/redmine-3.2.0-1/ruby/bin/rake

Overwrite the executable? [yN]  y
Successfully installed rake-10.4.2
Parsing documentation for rake-10.4.2
Installing ri documentation for rake-10.4.2
Done installing documentation for rake after 1 seconds
1 gem installed

C:\BitNami\redmine-3.2.0-1>gem list
```

截图部分出现【yN】时直接输入 Y 即可。

最后执行 C:\BitNami\redmine-3.2.0-1\apps\redmine\htdocs\plugins>rake redmine:plugins:migrate RAILS_ENV=production 命令

```
C:\BitNami\redmine-3.2.0-1\apps\redmine\htdocs\plugins>rake redmine:plugins:migrate RAILS_ENV=production
(in C:/BitNami/redmine-3.2.0-1/apps/redmine\htdocs)

Migrating redmine_agile (Redmine Agile plugin (Light version))...
== 1 CreateIssueStatusOrders: migrating =====
-- create_table(:issue_status_orders)
   -> 0.0080s
-- add_index(:issue_status_orders, :issue_id)
   -> 0.0290s
```

重启服务安装完成

The screenshot shows the Redmine Agile plugin interface. At the top, there is a search bar and a navigation menu with items: 概述, 活动, 问题, 新建问题, 甘特图, 敏捷, 日历, 新闻, 文档, Wiki, 文件, 配置. The main heading is '敏捷看板' (Agile Kanban). Below this, there are filter and options sections. The Kanban board has four columns: '新建 (0)', '进行中 (1)', '已完成 (0)', and '已退回 (0)'. A single card is in the '进行中' column, titled 'scrum功能测试' with a 'test' label. At the bottom left, there are '应用' (Apply) and '清除' (Clear) buttons.
